

Year-round comfortable interior environments
that do not cost the earth

LOCAL GOVERNMENT AND NHS

Aspen Air Conditioning has carried out many varied projects for local authorities including Wealden District Council, East Sussex County Council, London Borough of Bromley, Eastbourne Borough Council, Havant Borough Council, Horsham District Council, Brighton & Hove Council and others. Projects have included general offices, IT server rooms and meeting rooms.

Aspen Air Conditioning has also been contracted to work for numerous hospitals including: Eastbourne District General Hospital, Hastings Conquest, Kings College and Moorfields Eye Hospital in London, Worthing Victoria and Royal Sussex County Hospital in Brighton. Projects have included operating theatres, day surgeries, offices, specialist wards, X-Ray rooms, comms rooms, nursery units and blood stores.

With our extensive experience of working with public sector organisations, we understand their working patterns and our flexible teams can make sure installations are carried out at times of the day, that allow the daily business to continue, uninterrupted.

HEALTH AND FITNESS CLUBS

Health and fitness clubs can combine open plan gym environments with small beauty or treatment rooms, changing areas, and often swimming pools. Aspen Air Conditioning has the expertise to design and install systems capable of coping with the different requirements of each type of room.

Many new health clubs and gyms mention their air conditioning systems as one of their key benefits to new members. At Aspen Air Conditioning, we understand gym users' needs for the right training climate and can tailor our installations for both the gentle jogger and the serious athlete.

Successful installations have been carried out at David Lloyd Leisure, Leander Rowing Club, Wellshurst Golf Club and Eastbourne District General Hospital gyms.
